

Bison Standard Chute

# Bison Manual Chute

**Everything You Need To Get The Job Done**

## Manual Chute Standard Features

- Double side squeeze to keep the animals centered straight and stable
- Double side adjustable bottom to handle all sizes of animals from calves to bulls.
- Double side exit. Side opposite controls opens with rope controlled latch.
- Crowd ahead bar to help those stubborn animals forward and keep them from going all the way to the back when the Headgate is released.
- Fully enclosed side windows to keep the animals moving forward. Also keeps the animals legs and head inside the chute.
- Top is fully enclosed with sheet steel.
- All sheet steel is Galvaneal for longer life.
- Dropdown and/or removable foot doors for feet and leg work.
- Manual headgate capable of handling all sizes of animals with no-adjustments necessary.
- Control levers placed out of the way, yet within easy reach, for added operator safety.
- Crash cage with slant both top and bottom to keep the animals feet and head where they need to be.
- Swing out crash cage opens from left or right.
- Animal floor with 10 gauge galvaneal sheet steel underneath.

## Manual Chute Options

- Spring loaded crash cage, making it easier on the animals and the chute.
- Palpation cage.
- Scales.
- Portable attachment.
